Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8,32,33,35,38,39,46-54 are rejected under 35 U.S.C. 102(b) as being anticipated by Bouwkamp.

Figures 8,9 show structure as claimed, including a base 11a with an internal passage, a glide member 12a with an opening and an annular upstanding ring area which engages the bottom wall of the base, and an end cap 26,27 which extends through the opening in the glide member and into the base. Note the recess 25 in the glide member for receiving an outer flange of the end cap.

In regards to claim 39, note that the seat is located forwardly of the “base” of the rear legs.

Claims 8,32,34,35,38,46,47,49-51,53,54 are rejected under 35 U.S.C. 102(b) as being anticipated by Ladyman.

Figure 6 shows structure as claimed, including a base 23 with an internal passage, a glide member 25 with an opening and an annular upstanding ring area 26 which engages the base, and an end cap 30-32 which extends through the opening in the glide member and into the base. The end cap includes a series of ridges or “threads” which engage the wall structure of the base.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 36,37 and 40-45 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Bouwkamp or Ladyman.

In regard to claims 36 and 37, the type of material utilized is considered a matter of design choice.

Regarding claims 40-45, the method of mounting the glide structure of Bouwkamp or Ladyman would appear to encompass the method steps as set forth.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pratt, Matlack, Schneiderman, Barile, Bales et al, Drum and Chen show various features of the invention.
